H3 SmartLVL15

Revolutionary H3 preervative treatment process

SmartLVL 15 H3 is manufactured from pretreated veneer, thus, unlike post production pressure treatments, the preservative chemical* is evenly distributed across the full cross section of the LVL.

This provides a far superior level of protection than competitive LVL products that only use post production pressure treatment.

* Propiconazole + tebuconazole + permethrin

H2O Shield[®] Short-term water repellent

SmartLVL15 comes with a clear short-term water repellency. H2O Shield is a high penetrating water-based surface treatment formulated to repel rain during storage and construction. H2O Shield is paintable with acrylic or oil based coatings, and glueable using standard construction adhesives.

High performance

SmartLVL15 is one of the strongest mass-produced LVLs in the Australian market, meaning smaller cross sections for the same span properties as lower grades of LVL.

Comprehensive range

SmartLVL15 offers the most comprehensive range in the market.

Available in 27 section sizes, widths of 42mm, 58mm and 75mm and a range of 15 different heights.

Certified

SmartLVL15 is third party product certified by a JAS-ANZ accredited body as being manufactured in conformance with AS/NZS 4357 structural laminated veneer lumber.

Tilling Design Resources

SmartDesign Centre

Design Services, Technical, and Engineering Support.

Contact our dedicated engineering technical support services team for accurate, timely and professional advice regarding your construction project.

The SmartDesign Centre provides:

- Full engineering support on all SmartFrame Engineered Wood Products.
- Free SmartFrame floor plan designs from building plans, via your local Timber Merchant.
- Structured SmartFrame software training program for external users.
- Certification of engineering designs to relevant state building acts and regulations.
